

WideWeb for Clients

Description

WideWeb is the Online Booking and Track & Trace system of Seabourne Express Courier Group.

Login

WideWeb is available in three languages (French, English and German). You can choose your preferred language by clicking on the flag at the top of the login screen.

The screenshot shows the WideWeb login interface. At the top, there is a blue header with the "COGIweb" logo on the left and the "COGITECH SOFTWARE" logo on the right. In the center of the header, there are three small flags representing France, the United Kingdom, and Germany. Below the header is a light blue background with a central yellow login box. The box is titled "Login" and contains the following elements: a "Track & trace :" section with a label "N° AWB or X-ref. >" and an input field, followed by a "SEND" button with a green checkmark; a "Registered user :" section with labels "User name >" and "Password >" and corresponding input fields; a link "Have you forgotten your password?" with a green checkmark; and two links at the bottom: "New Pickup Request" and "Shipments", both with green checkmarks.

You can either enter an AWB number and look at the details for the shipment or enter your Seabourne allocated user name and password to have access to the various functions of WideWeb.

The user name and password are allocated by Seabourne Express Courier and issued to a Client for their exclusive use. These codes must not be made public, passed on or used for any purpose other than intended by its allocation.

The functions available are:

- Shipment List
- Shipment Search
- Pickup Request
- Pickups Pending
- Tariff Quotation

WideWeb for Clients

Shipments List

The  button opens a screen displaying a list of all your shipments, past and present.

AWB	Date	Ori.	Dest.	Transport mode	Consignee	City	Ctry.	Pcs.	Wgt.	Srv.	POD

Transportation Mode: Requested transportation mode

Pickup Date from/to: If there are no preset time constraints on file for the client, the “from” time is taken as the actual time now and the “to” time as +2 hours. If there are time constraints in the client record these times are used. All times can be amended.

Pickup instructions: Displayed from the information held for the client. Can be entered or amended.

Product: The product type is displayed. After a consignee is selected the system suggests the correct product, but it can be changed.

Delivery Date from/to: If there are no time constraints in the address record the actual time is taken as the “from” time and actual time +2 hours as the “to” time. If there are time constraints in the consignee address record these times are chosen. All times can be changed.

Delivery instructions: Displayed from the information held for the consignee address. Can be entered or amended.

Options: If a client is not authorised for special services only special driver and insurance can be selected.

WideWeb for Clients

Time Constraints: If the option is Yes a little “+” will be displayed and with a click on the icon you get to the screen for entering time constraints for this address.
